

TRUCKDOCK CHS431 20 ft.

The truckdock CHS431 consists of a hydraulic scissor lift with above a 20 ft. electric driven roller deck with side-shift function and automatic pallet stops. By means of the scissor lift, the truckdock will be adjusted to truck level, the side-shift function makes it possible to align the roller deck of the truckdock when the truck hasn't been parked straight in front of the truckdock.

Dimensions l x w	: 7200 x 2700 mm
System level	: 508 mm
Stroke	: 1250 mm
Carrying velocity	: 18 m/min
Loading capacity	: 2 x 6800 kg
Electric power	: 2 x 1,1 kW
Hydraulic unit	: 11 kW

Options:

- Ram protection: non-driven rollers / hydraulic driven vulcanized conveyor roller (CHS470)
- Operator platform: one side / both sides (CHS471)
- Electric winch: tractive power 1000 kg (CHS472)
- Surface treatment: hot dip galvanized
